

Advancing Worker Rights: 80 Years After Passage of the NLRA

Session Abstract:

In addition to a consideration of the current state of workers' rights 80 years after the passage of the NLRA, panel presentations will emphasize specific proposals for the advancement of workers' rights now and in the future.

Session Description:

Panelists will address prospects for reform, collective rights and individual rights, the rights of workers excluded from the NLRA, workers' understanding of what their rights are, and workers' rights as human rights. This symposium will present the experience-based insights of high-level practitioners; thus papers will not be required.
